

The SINA-NET in Open/Big data management within ISPRA and SNPA

Perugia, November 22nd 2018

Giuseppina Monacelli ISPRA

Outlines

- ISPRA within the international context
- Overview: Water JPI, PRIMA, INFO/RAC, WASAG
- The National Environmental Information System
- Data workflow management within the SINA
- Examples of Data Integration: National Biodiversity Network (NNB) and INFOAria

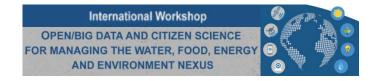

Sistema Nazionale per la Protezione dell'Ambiente

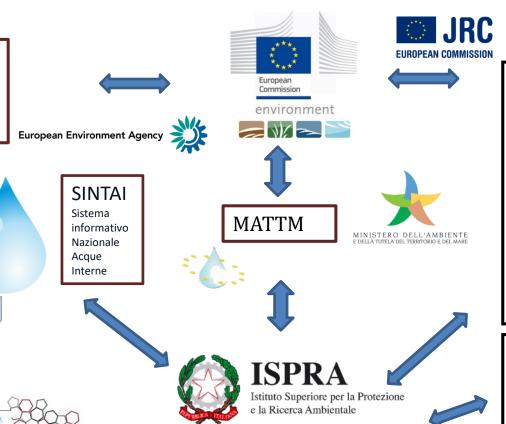

SNPA

EU Water Framework Directive EU Floods Directive Water Information System for EU

PIANO

WATER JPI

<u>WatEur</u>

WaterWorks2014 WaterWorks2015

IC4WATER

WaterWorks2017

PRIMA

UNEP & FAO

INFO/RAC

WASAG

SINA (PFR-SIRA)

INTERNATIONAL INITIATIVES

Water Joint Programming Initiative Water challenges for a changing world

PRIMA - Partnership for Research and Innovation in the Mediterranean Area

UNEP/MAP INFO-RAC - Regional Activity Centre for Information and Communication

WASAG - The Global Framework on WAter Scarcity in AGriculture

WATERJPI: PARTNERSHIP AND THEMES

- Maintaining ecosystem sustainability
- Developing safe water system for the citizens
- Promoting competitiveness in the water industry
- Implementing a water-wise bio economy
- Closing the water cycle gap

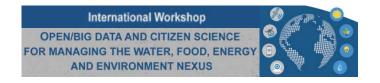

PRIMA: PARTNERSHIP AND THEMES

PRIMA can currently count on the partecipation of 19 Euro-Mediterranean countries, including 11 EU-countries (Croatia, Cyprus, France, Germany, Greece, Italy, Luxembourg, Malta, Portugal, Slovenia and Spain) and 8 non-EU countries (Algeria, Egypt, Israel, Jordan, Lebanon, Morocco, Tunisia and Turkey).

MANAGEMENT OF WATER

Integrated and sustainable management of water for arid and semi-arid Mediterranean areas

FARMING SYSTEMS

Sustainable farming systems under Mediterranean environmental constraints

AGRO-FOOD VALUE CHAIN

Sustainable Mediterranean agro-food value chain for regional and local development

UNEP MAP - INFO/RAC

The Regional Activity Centre for Information and Communication (INFO-RAC) was established in 2005. INFO-RAC was mandated to establish a common information management infrastructure to facilitate and support information and communication activities across MAP.

InfoMap

is the UN Mediterranean knowledge platform conceived to provide and share data, information services and knowledge.

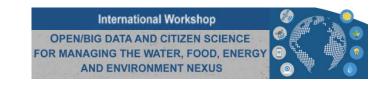

WASAG: WORKING GROUPS AND THEMES

• WASAG is open to a broad range of entities, such as States, international organizations, civil soicety organizations, academia, private sector entities and trade associations.

Within the Italian partners (CREA, CNR, CIHEAM, ENEA and MATTM), ISPRA is in charge of the Assessment of Climate Change Impacts and the WG on the Innovative Financial Mechanisms.

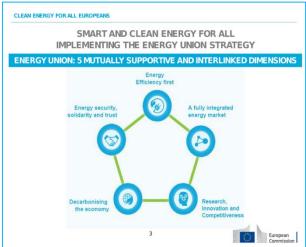

Further International Interactions

National Environmental Information System

- SINA implementation and management by the Regional Environmental Information Systems (SIRA).
- Cooperation ISPRA –
 ARPA/APPA regional and local
 autonomous authorities, in data
 collection and management.
- Free dissemination and access to SINANET.

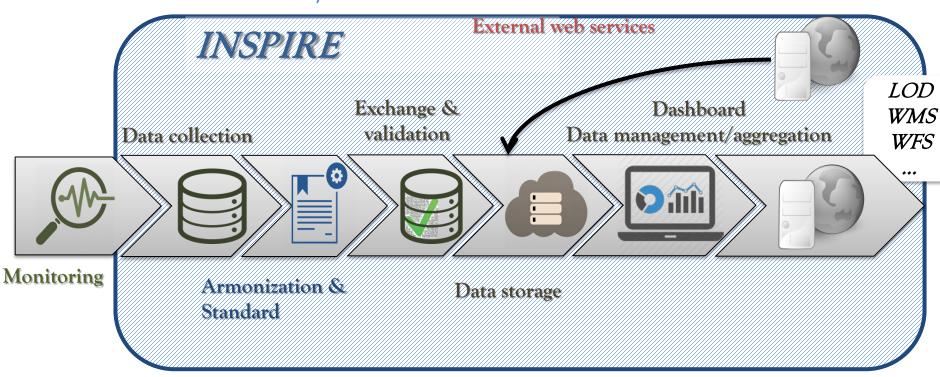

Workflow SINA/SINANET

Information system

Data dissemination

Two examples of data integration

- National Network for Biodiversity (NNB)
- National platform for air quality InfoARIA

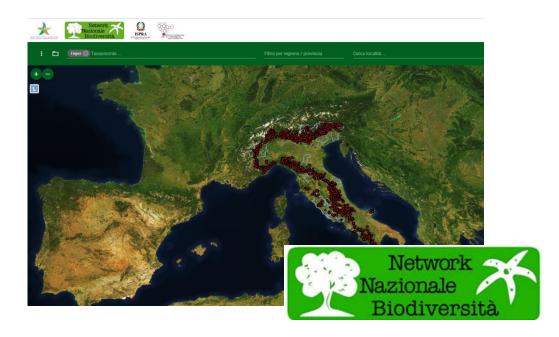

National Network for Biodiversity (NNB)

The shared data management system consists of a central node, which allows research and data management, and of peripheral nodes to ensure consultation and the efficient integration information on biodiversity, without the physical transfer of data, which always reside at cooperating institutions which retain all legal rights. The databases owned by the individual nodes differ in structure (different fields) and architecture (different DBs, such as Access, Oracle, Mysql, etc.), but they are able to communicate through the BioCASe Protocol.

The National Biodiversity Network integrates and enhances data (open data license) of the most important international projects of **Citizen Science** International, such as Global Biodiversity Information Facility (GIBIF) and iNaturalist.

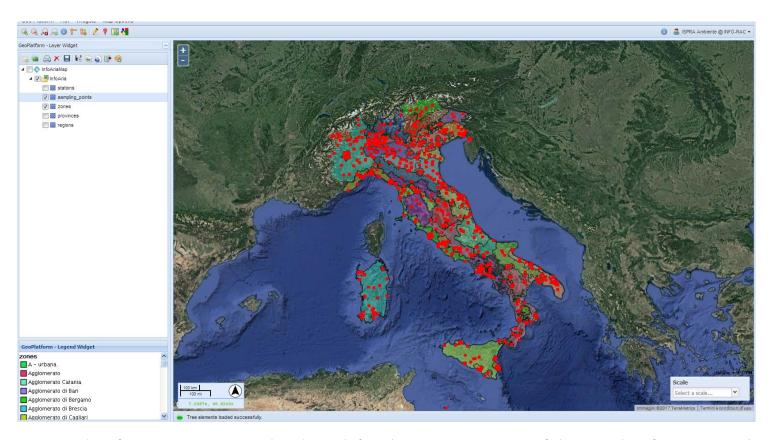

INFOARIA

A national information system developed for the management of data and information about air quality, **integrating information of 800 stations**, for the production of reporting data in compliance with the European Directives.

The management of big data is not about quantity but about their integrated analysis.

Thank you for your attention!
